Presenting a Master Key to the greatest treasure house of applied scientific knowledge in the world.

An important development in information retrieval . . . as beneficial to the reference librarian as the Cumulative Book Index. **The International Index of Patents** is the shortest route to all of the information, engineering and scientific technology to be found in patent literature.

Developed by the Interdex Corporation with the cooperation of the U.S. Patent Office, and distributed through Bro-Dart Books, Inc., these directories are fully cross-referenced to enable you to answer any question.

Material is indexed by Date . . . by Patent Number . . . by Subject . . . by Class and Subclass . . . by Standard Industrial Classification. There is even a

list of those patents, in each field of interest, issued before the inception of the numbering system in 1836.

Subscriptions are being accepted now for the first six volumes, covering every United States Chemical Patent issued from 1790 through 1960.

Three additional units are in process, covering Foreign Chemical Patents and U.S. and Foreign Electrical Patents, as part of a program to publish the complete body of patents covering all fields of endeavor.

For further information on the International Index of Patents please write to:
